combined meeting
ONE DAY PRE-MEETING COURSE

APRIL 11-14, 2007

In the amazing surroundings of the bay of Napoli, Sorrento will host both the 26th EPOS Meeting and the 4th IFPOS Meeting, providing to many specialists coming from all over the world, the opportunity to create a great scientific event.

During this important congress, attendees will have the chance to participate in a pre-meeting course on "Lower limb deficiencies". The main congress topics will focus on: "Treatment of malignant tumours in children", "Musculoskeletal infection in children" and "Spine pathology in children". Many papers and posters will be presented, the first best three ones will be awarded.

Presentations by esteemed Specialists and Colleagues and the discussion that will follow will represent a valuable resource for scientific updates. Sorrento, Capri, Amalfi, Positano, Pompei and Napoli will provide a wonderful opportunity to enjoy insuperable, natural, artistic and archaeological treasures that only the extraordinary history of this land is able to offer. It will be a great pleasure for me to welcome you in Sorrento.
